SKILLS

Data Structure and
Algorithm

React

Nodejs

Mongodb

AWS

System design Basics

Heroku

Netlify

LANGUAGES

SQL(https://www.hackerrank.com/mishra_?hr_r=1)

Limited Working Proficiency

Python

Professional Working Proficiency

Java

Professional Working Proficiency

Javascript

Full Professional Proficiency

EDUCATION

Btech

Cochin University of Science and Technology

2013 - 2017

Alleppey

Courses

- Computer science and Engineering

WORK EXPERIENCE

Machine Learning Intern

Draup

06/2019 - 09/2019

Bengaluru

Achievements/Tasks

- The objective behind the project was to forecast the the money spent on R&D of company .The features used were revenue generated by company for previous years,total headcount and industry name embeddings.The models that have been used were Random Forest and Linear Regression.The predicted amount was bit larger than the previous amount of money spent on R&D.
- The objective behind the project was to automate the tagging of the news .Earlier the news were tagged manually.Gradually the data set was becoming very large so it was difficult to tag it manually,so Machine Learning came into picture to automate it.The preprocessing steps were done like removing stop words and html tags and other special characters.Different features were created out the data set.The models biLSTM was over the preprocessed data and finally the news were segregated into different categories.

Full stack developer(Personal projects)

Contact-Keeper-App

Achievements/Tasks

- Contact-Keeper -App
- Implemented the contact keeper App from scratch using Nodejs ,Express and Mongodb for Backend and React for Frontend.In this each user will have many contact.All contact endpoints are protected and each registered user has their own contacts.A user can add and delete their own contacts.Here I have used JWT authentication purpose.

Github-finder-App(Personal Projects)

Github-Finder

Achievements/Tasks

- Implemented the Github-Finder -App. using Github Api one can access the Github Profiles.For developing the frontend part React was used. The Profile will have their name photo and their projects.
